

Code and Editing Updates Reminder

As a reminder, UCare uses multiple automated claims editing and pricing applications to ensure consistent and accurate processing of claims. Please allow time for the updates to be put into production to avoid resubmissions/adjustments/incorrect editing of the claims. Update and implementation dates vary. Please see UCare's [Provider Manual](#), Claims Chapter, for additional information.

New codes that have been identified for 2019 will be accepted into the UCare system as of the effective dates but are also subject to the same editing update and implementation dates.
