

Behavioral Health Claims Updates

UCare providers are asked to review the following updates on billing for these behavioral health services.

Consolidated Chemical Dependency Treatment Fund Claims

UCare recently identified a claims processing issue impacting a subset of Consolidated Chemical Dependency Treatment Fund (CCDTF) claims that resulted in some providers receiving payment amounts greater than their billed charge. UCare will not be adjusting the impacted claims. Future claims will process according to contractual payment terms. Please note, providers may notice a difference in the amount they receive on future claims because of this correction.

Mental Health Targeted Case Management (MH-TCM) Claims

UCare's reimbursement rate for MH-TCM is 100% of the Minnesota Medical Assistance posted rate or contracted county host rate at the time of service. Effective immediately, providers billing MH-TCM services should file claims to UCare with charge amounts listed at 100% of this rate.

UCare conducts periodic audits to ensure providers are billing the appropriate charge amounts to UCare. UCare reserves the right to collect any past or future overpayments associated with this issue.
